

Guess what's this?

10950

Think one more time, before you look down!!

“No”

What does 10950 mean?????????

Let's say, a person retires at the age of 60 yrs.

In the next 10 years i.e. from age 60 to age 70 he will consume food atleast 10950 times considering an average 3 meals a day.

(3times meal x 365days x 10 yrs= 10950)

He needs atleast Rs 10,95,000/- after his retirement for having meals & that too for himself only. (Partner not included) (Assuming 1 meal cost =100 Rs)

(300 Rs x 365 days x 10 yrs =10, 95,000)

Item	Cost Now	Age 55	Age 65
Basmati Rice 5kg	400	1864	4025
Atta 10kg	460	2144	4629
Tur Dal 1kg	80	373	805
Milk 1 litre	35	163	352
Oil 5 KG	480	2237	4830
Apples	120	559	1208
Nescafe 100 gms	140	653	1409
Dinner for 2	500	2330	5031

Have you thought about this??
